Subject: HB 5707 letter

Dear House Education Reform Committee members:

Please support bill HB5707 because it is what is best for students. Many states have already retracted the higher percentages of tests as part of teacher evaluation because the research shows that a focus on testing does not lead to authentic student growth. In the end, student growth is what matters. Treat teachers as professionals and balance all the facets of being an educator in teacher evaluation.

Thank you for your time.

Sincerely,
Jeanine Cull
